

Heavy-Duty Label Dispensers

In response to customer requests, LABELMATE has developed a new line of **Powered Label Dispensers**. These versatile and inexpensive products bring the industry new convenience and reliability in Label Dispensers.

You can choose between the **LD-100** that automatically advances your next label and presents it for instant picking, and the **LD-100S** that can continually advance labels at the rate you choose. The **LD-100S** also includes an ON-OFF Foot Switch and is ideal for very small or transparent labels that optical label sensor might not detect.

With either model, you just slide your roll of labels onto the built-in Core Holder. Use any core diameter from 1.5- to 3-inches and roll diameters up to 8.6-inches (220-mm). Then thread the label web through to the take-up spindle and your Label Dispenser is ready for use!

Using the latest technology, the versatile **LD-100 Label Dispensers** work with virtually any kind of label. Their heavy-duty design will stand up to the most demanding environments. Rugged, heavy-gauge steel construction and precision parts yield products of the highest quality. Designed for all-day, every-day use, the **LD-100** and **LD-100S** are backed by LABELMATE's famous **3-Year Parts and Labor Warranty**, assuring you trouble-free performance.

Put a new LABELMATE Heavy-Duty **Label Dispenser** to work for you, today!
